## Think together

(1) There are 12 pairs of shoes.

How many shoes are there in total?

There are $\square$ shoes in total.

2 There are 16 shoes. How many pairs are there?

There are $\square$ pairs of shoes.

3 Complete each number track.
a)

| 16 | 18 |  | 22 |  | 26 | 28 |  | 32 |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- |

b)

c)

| 40 |  |  | 34 | 32 |  | 28 |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- |

I can see all these numbers end in $0,2,4,6$ or 8 . Is this always true?
